

Do You Really Know the Health of your Network??

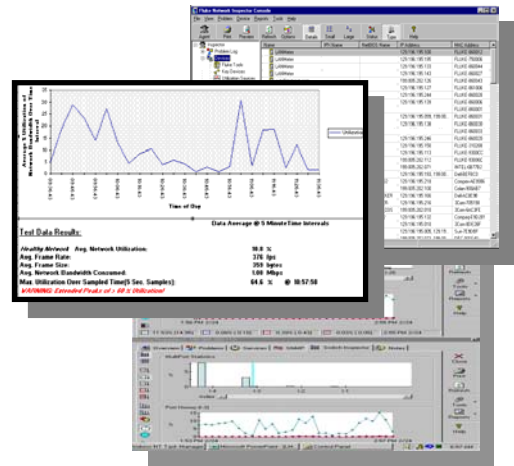

Why not let us give your Network a full INDEPENDENT HEALTHCHECK & AUDIT

The survey will look in depth at the overall health of your network and address in detail the following:

- Cable Infrastructure.
- Segment Design.
- Traffic and Error Profile.
- Addressing Structure for TCP / IP, Netbios and Novell.
- Top Senders, Receivers and Broadcasters.
- Protocol Mix.
- Conversation profiles
- The Performance of Switches and Routing Devices.
- Full Network Inventory IP,IPX,NetBIOS etc...
- Configuration issues
- Bottlenecks
- Plus, customer defined areas of concern

Results will be summarised in a full report with graphical representations of each area of performance that will highlight any issues of concern. In conjunction with these we will outline any recommended solutions to problems and suggest changes that may improve the general performance and health of your network.

" Eurotek's regular independent Network Healthchecks and Audits have become an integral part of our I.T, support, management and capacity planning strategy"
